QUALITY

EFFICIENCY

Based on our world-class reverse logistics framework, **Hardware Resale** offers you flexible options to buy, sell or consign data centre equipment through us via asset trade-in and buy-back programmes.

Adopting a vendor-agnostic approach, we offer a wide range of servers, storage and networking products from all major IT brands, yielding more than 70% cost savings off your data centre equipment.

CHANGING THE WAY

THE WORLD BUYS TECHNOLOGY

Source globally from one touchpoint

With strategic sourcing via our global network, our international, multilingual team of hardware specialists will simplify your procurement process with optimised cost savings, from a single touchpoint.

Hassle-free multi-country deployment

Supported by our state-of-the-art inventory management system, our world-class logistics team provides timely and secure delivery to 100+ countries globally.

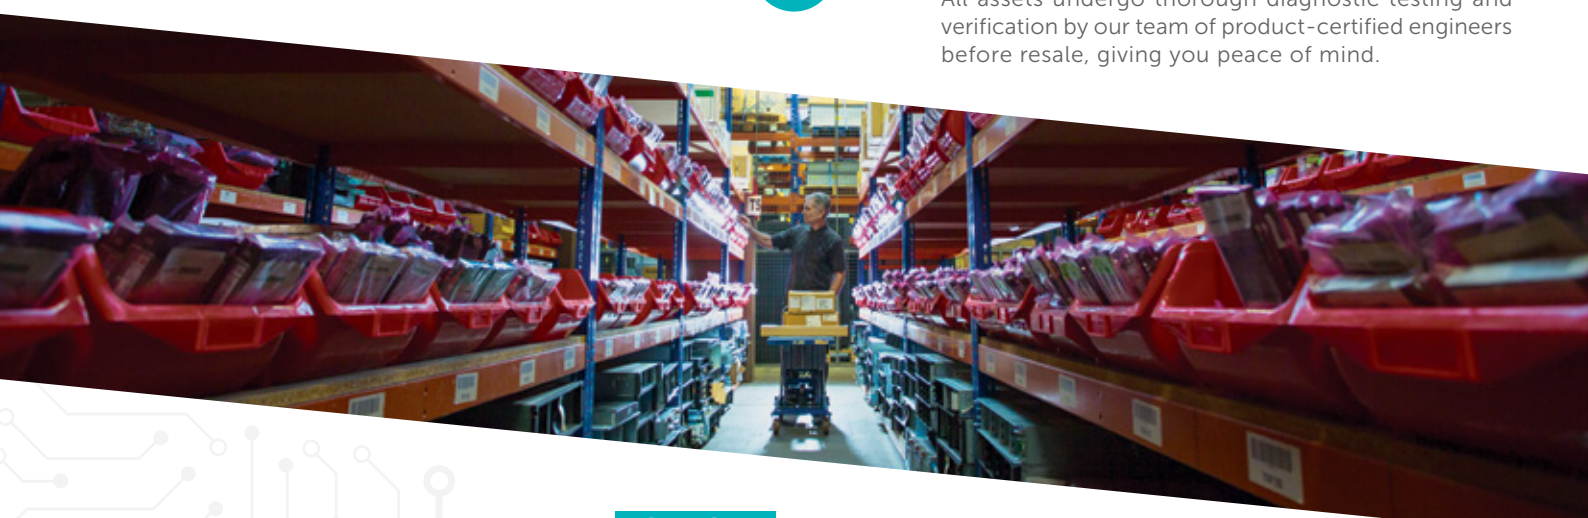

Wide range of data centre equipment

Our 6 global warehouses located across 3 regional hubs stockpile an extensive inventory of multi-vendor equipment, ranging from new resale, pre-owned, hard-to-find to end-of-life hardware.

One-stop trusted source

All assets undergo thorough diagnostic testing and verification by our team of product-certified engineers before resale, giving you peace of mind.

CASE

STUDY

• Requirements •

To ensure a smooth data migration from decommissioned enterprise systems in Amsterdam to their data centre in Michigan, our client needed a provider that could provide a "like-for-like" hardware configuration for their end-of-life EMC and Brocade infrastructure.

• How we bring value •

Provided data erasure services that is compliant to local privacy and security regulations, giving clients peace of mind.

Leveraged on our engineering capabilities to configure racks of EMC disk and Brocade SAN hardware.

Tapped on Procurri's procurement expertise and global network to source for hard-to-find, end-of-life equipment in the open market.

Remarketed hardware through revenue sharing models to extract maximum value of IT assets.
