circular computing™

OUR PRIMARY MODELS

Carbon-neutral remanufactured laptops

Dell E5470

Dell E5490

HP 840 G2

HP 840 G3

HP840 G4

HP840 G5

Lenovo T450

Lenovo T460

Lenovo T470

Lenovo T470s

ALL OF OUR CORE MODELS FEATURE:

These models also have Configure to Order (CTO) options available to upgrade parts*

- Core i5 (up to 8th Gen)
- 8GB RAM
- 256GB SSD
- 14-inch FHD screens
- 1-3 year warranties

*Lead times may vary depending on make and model.

CARBON-NEUTRAL SUSTAINABLE IT

Carbon-neutral remanufactured laptops available in large volume

Remanufactured and fully supported IT

Unrivalled enterprise grade equipment

Scientifically proven performance vs. new

A balance of performance, sustainability and cost

Ethically sourced and delivered with precision

Helping create sustainable communities

Key points

- Working with individuals, private companies and the public sector across the UK and Europe
- Saving thousands on laptops procurement with enterprise-grade IT equipment
- Sustainability benefits for individuals, businesses and communities around the world
- Available in large quantities
- Up to a 3-year warranty

Case Study: Balfour Beatty:

- Deliver positive social, ethical and environmental impact in line with their CSR ambitions.
- Purchased 5,000 laptops
- 3-year warranty provided reassurance
- Customer saving of over £1 million
- 25,000 trees planted via reforestation partners in India and Africa

About Circular Computing™

Our mission is to change the way the world buys IT - sustainability without compromising on performance or quality.

- We employ over 250 people
- Offices on three continents
- Deliver more than 250,000 computers a year

About remanufacturing

Remanufacturing under the ISO8887:211 standard is

"returning a used product to at least its original performance with a warranty that is equivalent to (or better than) that of the newly manufactured product".

- Enterprise-grade, leading brand laptops - Dell, Lenovo and HP
- 5+ hour remanufacturing process delivers unrivalled quality
- Available in high volumes

About sustainability

- Circular Computing™ laptops are a certified carbon-neutral product
- 85% less energy consumption to remanufacture than buying new
- Support solar, wind and clean energy projects across the world
- We plant 5 tress for every laptop sold to compensate for legacy emissions

One laptop means

- 600kgs of sequestered carbon emissions
- 190,000 litres of water saved
- 1,200kgs of resource preservation
- 5 trees planted via our reforestation partnerships
- 316kgs of carbon reduction
- 0% e-waste produced

circular computing™

REMANUFACTURED
VS REFURBISHED

REMANUFACTURED LAPTOPS

Consistent Quality
Every laptop goes through the same 5 hour remanufacturing process (to BS 8887 standards) to create a single grade of product that is close to new. We commit to this quality whether you take 5 or 5,000 laptops

Precision Engineering
Every laptop is separated into individual parts and repainted with state of the art robots using the exact matching colours and finishes of the original new product

Perfect Screens
Every single screen is dismantled and has at least one part replaced guaranteeing no scratches or pressure marks

Rigorous Testing
Every laptop undergoes Aiken testing as well as a minimum 3 hour stress test to run the major components at full load

Low RMA
We are currently running at less than 3% (based on 12 month rolling average of remanufactured laptops sold with a minimum of 12-month warranty)

Sustainability
Every Circular Computing laptop sold is Certified Carbon Neutral and we plant 5 trees for every laptop we sell. This helps the planet to capture more carbon and we support reforestation projects across 3 continents

TYPICAL REFURBISHED LAPTOPS

Inconsistent Quality
Varying grades and condition based on opinion means you will never be able to guarantee a standard of product

Basic Refurbishment
The traditional business model of minimum investment for maximum return means you will experience things such as vinyl skins being used to hide bad cosmetics

Limited Testing
Varying levels of undocumented testing means you might be buying a laptop that has only been tested to turn on

Filtered Screens
Filtering the best of the stock means getting good screens in volume is difficult

Higher RMA
Our customers tell us that they experience much higher RMA with traditional refurbished laptops
